Kristian Hohla Joins Management Team of 20/10 PERFECT VISION as Executive President

***Renowned entrepreneur and ophthalmic industry veteran strengthens
the leadership of senior management team to support growing market
share of the FEMTEC laser system***

HEIDELBERG, February 14, 2008 - 20/10 PERFECT VISION® AG announced today that it has appointed Dr. Kristian Hohla as Executive President, effective immediately. Dr. Hohla, a highly experienced senior executive in ophthalmic organizations, was instrumental in bringing modern Excimer laser technology to the global refractive surgery market.

Helmut Krueger, 20/10 PERFECT VISION's Chairman of the Supervisory Board commented: "We are thrilled that our executive team is now completed with such an outstanding leader. Dr. Hohla's broad experience and background is a perfect fit for the way we envision to continue developing the company as well as our relationship with our customers and partners." Mr. Krueger further said: "I also would like to thank Reinhard Mueller-Spaeth, who served as the company's CEO since late 2005, for his valuable service over the last years and wish him all the best." Reinhard Mueller-Spaeth leaves the company into retirement.

"I am absolutely delighted to welcome Kristian to our management team", said Dr. Frieder Loesel, General Manager and co-founder of 20/10 PERFECT VISION. "Kristian has a very impressive personal track record in the ophthalmic industry and I have admired his work for many years. Working now with him directly on one team is a dream come true." Dr. Loesel added: "Also, I would like to personally thank Reinhard for his strong support and guidance during the years we shared and now wish him a great value time with his family."

"The FEMTEC's unique technical capabilities and the very promising preliminary clinical data of 20/10 PERFECT VISION's proprietary non-invasive intrastromal refractive procedures will introduce a change in paradigm to the refractive surgery world", said Dr. Kristian Hohla. "I am excited about joining the team and further building a trusted premier technology partner to the ophthalmic surgeon." Prior to joining 20/10 PERFECT VISION, Dr. Hohla among other was founder and served as CEO of TECHNOLAS GmbH, the manufacturer of refractive Excimer laser products which was acquired by Bausch & Lomb. Dr. Hohla can be contacted at kristian.hohla@2010pv.com.

About 20/10 PERFECT VISION:

20/10 PERFECT VISION AG of Heidelberg, Germany, develops, manufactures and markets innovative technologies for raising refractive surgery well beyond current expectations. The company's FEMTEC femtosecond laser workstation is set to revolutionize the ophthalmic surgery market, while keeping ease-of-use and patient safety as primary objectives. The ISO 9001:2000 and ISO 13485 certified company also developed WaveScan™, the award-winning wavefront diagnostic device for refractive surgery, acquired by VISX™ (now AMO™, Inc.).
